

An introduction version control

https://stirlingcodingclub.github.io/version_control.pdf

Brad Duthie (alexander.duthie@stir.ac.uk)

13 May 2025

Using version control

- ▶ Understand what version control is and how it can be integrated into your work flow

Using version control

- ▶ Understand what version control is and how it can be integrated into your work flow
- ▶ Focus on practical skills for research
 - ▶ Learn and reinforce knowledge on how to use **key skills** effectively
 - ▶ Focus on [GitHub](#) and [GitHub Desktop](#) software

Using version control

- ▶ Understand what version control is and how it can be integrated into your work flow
- ▶ Focus on practical skills for research
 - ▶ Learn and reinforce knowledge on how to use **key skills** effectively
 - ▶ Focus on [GitHub](#) and [GitHub Desktop](#) software
- ▶ Hands-on practice setting up and using version control in your own work with [accompanying notes for guidance](#)

https://stirlingcodingclub.github.io/version_control

Rough outline of version control

1. What is version control, and why use it?
2. Getting set up – good file management
3. Setting up [GitHub](#)
4. The [GitHub Desktop](#) tutorial
5. Independent work using version control

What is version control, and why use it?

What version control software does

- ▶ Software that records changes you make to files over time
 - ▶ Manage different *versions* of files (no need to 'Save As...')
 - ▶ Recover old files, keep track of file changes
 - ▶ Collaborate with others on shared files

What version control software does

- ▶ Software that records changes you make to files over time
 - ▶ Manage different *versions* of files (no need to 'Save As...')
 - ▶ Recover old files, keep track of file changes
 - ▶ Collaborate with others on shared files
-
- ▶ **Put more intuitively**, version control takes a snapshot in time (called a '**commit**') of all the files in one of your folders (called '**repositories**')
 - ▶ Visualise changes to your files over time
 - ▶ Look at the differences between file versions
 - ▶ Record who changed files, and what they changed

Inside of a project on version control

Folders (a.k.a, 'repositories') include all data files, R code, notes, manuscript drafts, etc.

Full annotated timeline of folder changes (GitHub)

Commits on Mar 1, 2019

Some work on the SI

 **bradduthle** committed on 1 Mar 2019 ✓

5d29331

Major restructure and revision of the Discussion to compare to Gibbs

 **bradduthle** committed on 1 Mar 2019 ✓

..et al.

a40ede5

Commits on Feb 27, 2019

Edit the manuscript up to Reviewer 2 specific comment 3 -- these are

 **bradduthle** committed on 27 Feb 2019 ✓

..next on the list, specifically the new Discussion paragraph

d411fd5

Commits on Feb 22, 2019

First pass, fix some notation

 **bradduthle** committed on 22 Feb 2019 ✓

39f854b

Add some to the abstract to emphasise finite systems

 **bradduthle** committed on 22 Feb 2019 ✓

612aa4b

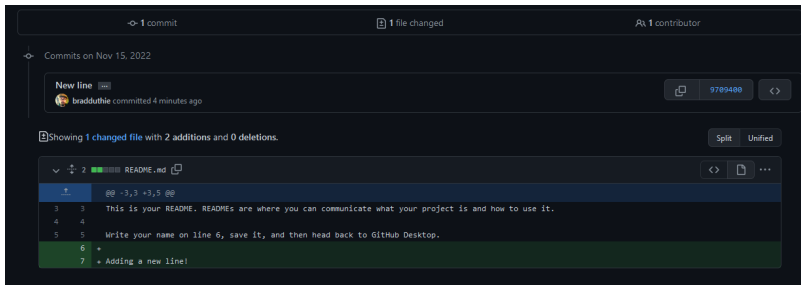

Parallel versions ('branches') of a folder

The screenshot shows the GitKraken application interface. The top bar includes the application name 'GitKraken' and a search bar for commits. The left sidebar shows the repository structure with a file explorer. The main area displays a commit history with a vertical timeline of commits, each with a commit message and a user avatar. The commit messages include:

- add independent alleles for crops and pathogens
- Fix link
- Explanation of toy model
- Draft toy
- Stable toy
- Working model simulation
- Delete old stuff
- add most of the toy model subfunctions
- Working function to move the pests
- Two new functions
- Initialise the toy model with a landscape initialise function
- Merge branch 'interface' of <https://github.com/bradduthie/helicoverpa> into loc
- added explanation of assets
- sidebar complete with toggle transistions and helicoverpa rearrangement
- toggling sidebar with start of control form
- added masonry CDN and fixed paths to output.json for server
- moved script from ignored bower_components to try and resolve server viewing of page
- Some Ideas about code structure
- altered patch background colours
- Index.html showing patches built by js from json data
- Add landscape structure notes
- Add pest data structure notes
- Fix TOC
- Attempt to add a comment section
- Initialise notebook
- Add references

Clear breakdown of what has changed

The screenshot shows a GitHub commit diff interface. At the top, it indicates "1 commit", "1 file changed", and "1 contributor". Below this, it shows the commit message "New line" by user "bradduthie" committed 4 minutes ago. The diff view shows a single file, "README.md", with 2 additions and 0 deletions. The changes are highlighted in green. The diff shows a hunk starting at line 3, with lines 3 and 4 being unchanged, and lines 5 and 6 being added. Line 5 contains the text "Write your name on line 6, save it, and then head back to GitHub Desktop." and line 6 contains the text "Adding a new line!".

1 commit 1 file changed 1 contributor

Commits on Nov 15, 2022

New line
bradduthie committed 4 minutes ago

Showing 1 changed file with 2 additions and 0 deletions. Split Unified

2 README.md

@@ -3,3 +3,5 @@

3 3 This is your README. READMEs are where you can communicate what your project is and how to use it.

4 4

5 5 Write your name on line 6, save it, and then head back to GitHub Desktop.

6 +

7 + Adding a new line!

Version control makes science easier

- ▶ **Organises files** by avoiding 'save as' multiple versions
 - ▶ analysis_1.R
 - ▶ analysis_2.R
 - ▶ analysis_FINAL.R
 - ▶ analysis_FINAL_no_really_this_time.R

Version control makes science easier

- ▶ **Organises files** by avoiding 'save as' multiple versions
 - ▶ analysis_1.R
 - ▶ analysis_2.R
 - ▶ analysis_FINAL.R
 - ▶ analysis_FINAL_no_really_this_time.R
- ▶ **Provides a clear history** of what you have done, when, and why (through commit comments)

- ▶ **Provides a clear history** of what you have done, when, and why (through commit comments)
- ▶ **Saves time** by avoiding loss of data, analysis, or writing when integrating with [GitHub](#)
- ▶ **Gives peace of mind** to experiment by removing any fear of breaking something that you know works

Version control can help open science

- ▶ Transparent record of data collection, analysis, and writing
- ▶ Record publicly available on [GitHub](#), [Bitbucket](#), or [GitLab](#)
- ▶ GitHub repository can be copied, reproduced, and discussed
- ▶ [git](#) and GitHub can track individual contributions to a project

Most researchers use git (and GitHub)

- ▶ Free and open-source
- ▶ Separate from [GitHub](#)

Most researchers use git (and GitHub)
